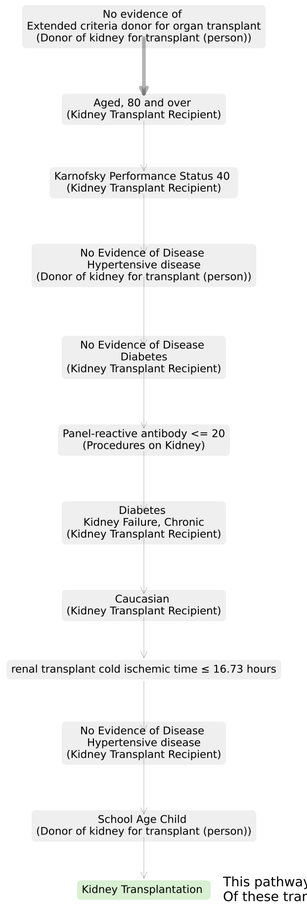
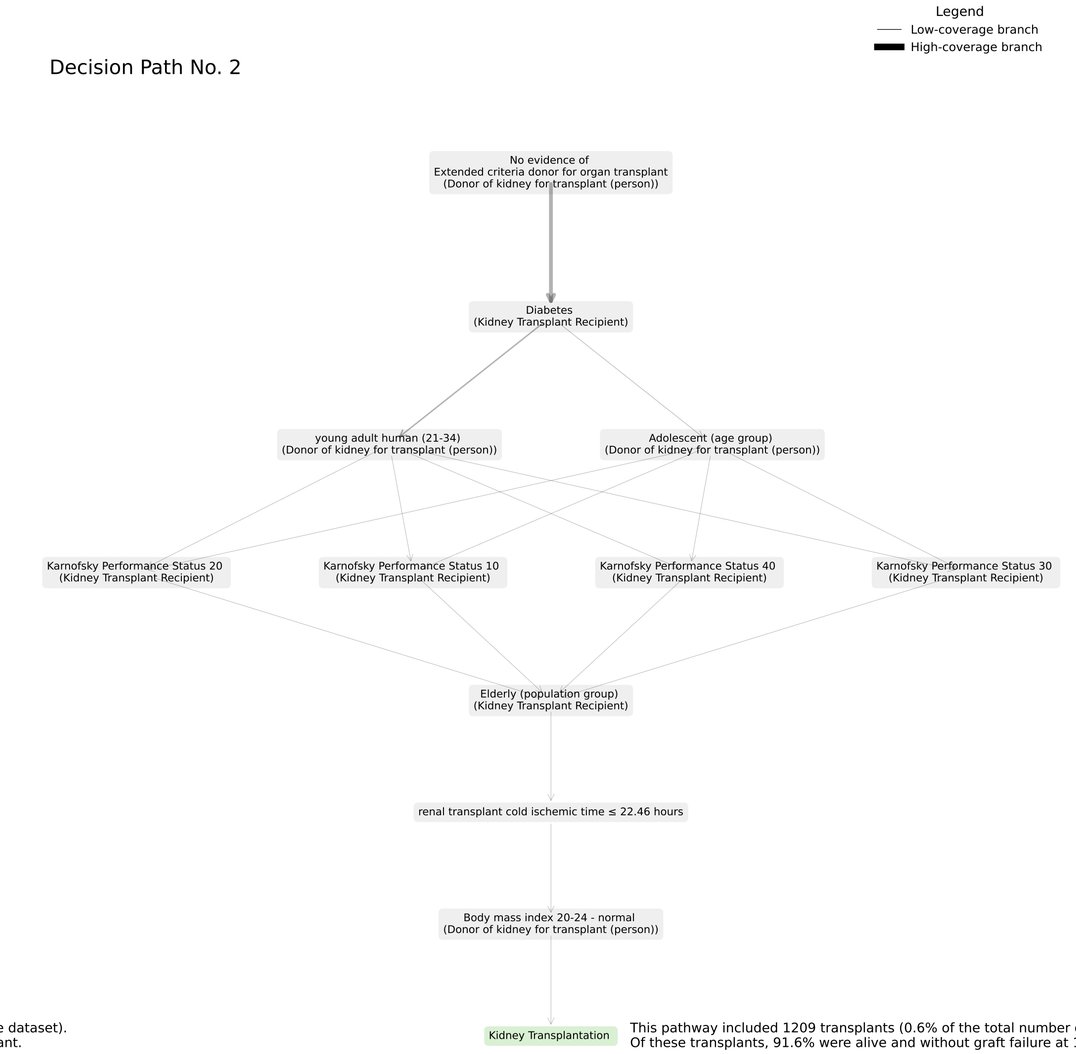
Decision Path No. 1



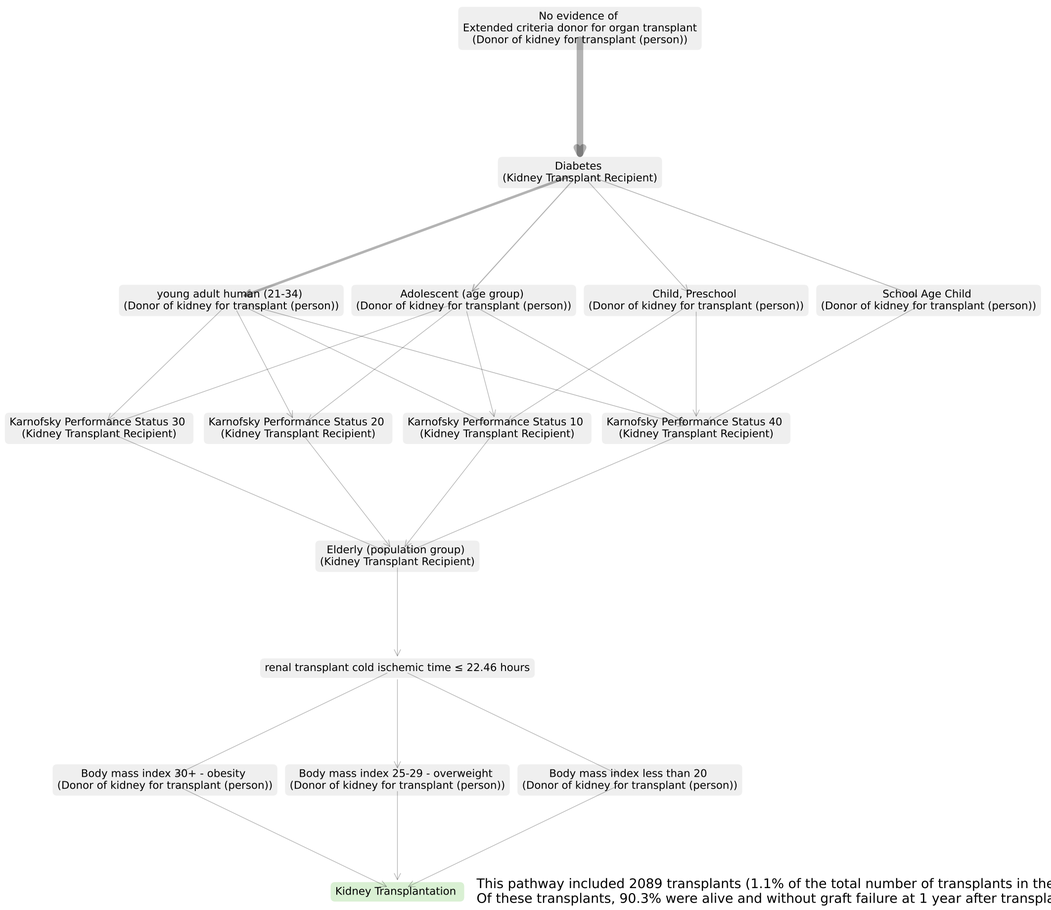
This pathway included 1155 transplants (0.6% of the total number of transplants in the dataset).
Of these transplants, 94.5% were alive and without graft failure at 1 year after transplant.

Decision Path No. 2



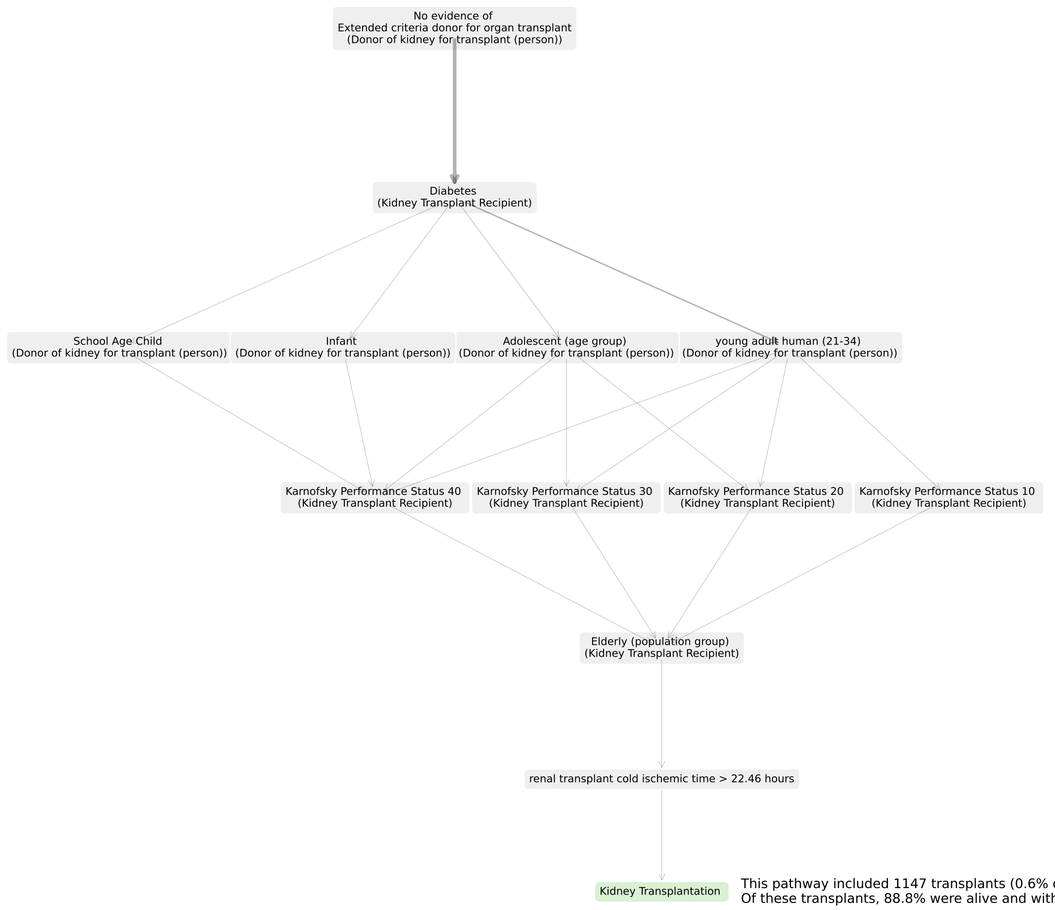
This pathway included 1209 transplants (0.6% of the total number of transplants in the dataset).
Of these transplants, 91.6% were alive and without graft failure at 1 year after transplant.

Decision Path No. 3



This pathway included 2089 transplants (1.1% of the total number of transplants in the dataset).
Of these transplants, 90.3% were alive and without graft failure at 1 year after transplant.

Decision Path No. 4



This pathway included 1147 transplants (0.6% of the total number of transplants in the dataset).
Of these transplants, 88.8% were alive and without graft failure at 1 year after transplant.
